## Central Intelligence Agency

The Honorable Lee H. Hamilton Chairman House Permanent Select Committee on Intelligence U.S. House of Representatives Washington, D.C. 20515

Dear Mr. Chairman:

This letter is written to provide you with an update on our experiences with the experimental grade banding pay program we are conducting in the Agency's Office of Communications. At this time, we have just completed our first year of operation under the experimental program. While it is still too early to fully assess the long-term impact of the program on recruitment and retention, or on overall payroll costs, we continue to be optimistic about the future utility of pay-for-performance in the Agency.

We have completed an attitude survey of participants in the experimental program to assess the acceptance of pay-for-performance by participating employees, and to assess their understanding of the program. Our initial response from participants indicates that they do understand the new pay program, and that over 75 percent of those responding to the survey are supportive of a pay-for-performance system. We are currently conducting a follow-up attitude survey to assess the changes in attitudes after the first performance awards were granted in September 1985, but will not have the results until spring 1986.
